

ORDINANCE No. 2016-24

CAPITAL IMPROVEMENTS PLAN FY2017 – FY2021

Overview

The Capital Improvements Plan (CIP) is a five-year plan for the maintenance, construction, renovation, and/or expansion of the infrastructure of the City of Waynesboro, Virginia. The projects contained herein are those that have been identified by City Staff on the basis of the following criteria:

- External mandates
- Health and public safety
- Maintenance or enhancement of existing quality of service
- Alignment with the City's Comprehensive Plan and Council's Vision
- Identification of new needs
- Prior level of investment or commitment

CIP projects are divided into two types:

- 1) General Fund. Projects of this type are typically funded through locally derived revenues. If funds are borrowed for the projects, debt service is usually covered by the operational savings derived from the project itself (performance contracting) or local revenues. Funds may also become available from grants.
- 2) Enterprise Fund. Projects of this type are typically funded through fees charged for services, specially assessed fees (such as the City's I&I fees), connection/facility fee income, or borrowed funds. In recent years enterprise projects have relied heavily on Water Quality Improvement Grant Funds, Water Revolving Loan Funds and bond issues.

Following is a listing of CIP projects.
