Engineering Division

- The Stormwater Program staff within the Engineering Division perform these core tasks:
 1. Regulatory Compliance for the City's **MS4 Program**
 2. Project Management for City Capital Improvement Projects
 3. Technical Support for Public Works Operations maintenance and construction projects

City staff will inspect detention ponds to make sure the facility is operating properly

What is an MS-4?

The City was designated in 2013 as a **Municipal Separate Storm Sewer System** because of the density of urban development within the City.

What does this mean?

The City was issued a permit from the State of Virginia to discharge water from storm drains to local creeks and the South River. That permit requires the City to operate an MS4 Program to monitor and maintain the storm drain system and to employ measures to protect water quality in those receiving streams.

Operations

Public Works Operations staff perform several critical jobs to keep stormwater flowing in our City.

- Curb and Gutter Maintenance and Installation
- Storm Drain Maintenance and Installation
- Emergency Response
- Street Sweeping
- Mowing City-owned ponds
- Leaf Removal
